P4 PO1)

Big Bang Web Quest
For each of the following questions, answer them in complete sente

What was the person that made the discovery that the universe was expanding? What year was it?  What was the Big Bang? Describe where the matter came from and where it went or is going.  After the Big Bang and the universe began to cool, the protons, neutrons and electrons began to come together. What were the first elements to fuse together from these subatomic particles?  Approximately how old is our universe?  In 1990, this piece of equipment was sent into space to allow astronomers to peer farther into the universe and see the cosmos more clearly. What was it? Who was it named after? And when is it going to be replaced? Hint universe expansion guy.  What is a Red Shifted Galaxy? Why does it look the way it does?	What is a theory?
After the Big Bang and the universe began to cool, the protons, neutrons and electrons began to come together. What were the first elements to fuse together from these subatomic particles?  Approximately how old is our universe?  In 1990, this piece of equipment was sent into space to allow astronomers to peer farther into the universe and see the cosmos more clearly. What was it? Who was it named after? And when is it going to be replaced? Hint universe expansion guy.	
began to come together. What were the first elements to fuse together from these subatomic particles?  Approximately how old is our universe?  In 1990, this piece of equipment was sent into space to allow astronomers to peer farther into the universe and see the cosmos more clearly. What was it? Who was it named after? And when is it going to be replaced? Hint universe expansion guy.	
In 1990, this piece of equipment was sent into space to allow astronomers to peer farther into the universe and see the cosmos more clearly. What was it? Who was it named after? And when is it going to be replaced? Hint universe expansion guy.	began to come together. What were the first elements to fuse together from these
In 1990, this piece of equipment was sent into space to allow astronomers to peer farther into the universe and see the cosmos more clearly. What was it? Who was it named after? And when is it going to be replaced? Hint universe expansion guy.	Approximately how old is our universe?
What is a Red Shifted Galaxy? Why does it look the way it does?	In 1990, this piece of equipment was sent into space to allow astronomers to peer farther into the universe and see the cosmos more clearly. What was it? Who was it named
What is a Red Shifted Galaxy? Why does it look the way it does?	
	What is a Red Shifted Galaxy? Why does it look the way it does?

In your search through the internet, find a web site that explains the big bang theory in
erms that you can understand. Write down its web address and a brief summary of the page.
What evidence can you find that support the Big Bang Theory?
